Election/Restrictions

This application contains the following inventions or groups of inventions which are not linked to form a single general inventive concept under PCT Rule 13.1. In accordance with 35 U.S.C. 121 and 372 and 37 CFR 1.499, Applicants are required to elect a single invention to which the claims must be restricted.

- I. Claims 1-4, 15 and 16, drawn to a special technical labeling method
- II. Claims 5-7, and 17, drawn to a special technical kit
- III. Claims 8, 9 and 14, drawn to a special technical screening method
- IV. Claims 10-13 and 18-22, drawn to a special technical labeling method

According to PCT Rule 13.2, unity of invention exists only when the invention shares a same or corresponding technical feature that is a contribution over the prior art. Here, the product of Invention II is used in the methods of Inventions I, III and IV. However, the technical feature linking Invention II with Inventions I, III and IV does not constitute a special technical feature as defined by PCT Rule 13.2 because the technical feature does not define a contribution over the prior art.

Specifically, Narang *et al.* (US 2005/0196431) describes all the elements of Invention II, including kits (see paragraph [0086], "applicators may incorporate or be packaged, such as in saleable kits, with one or more containers containing the adhesive composition") comprising adhesive tape (see paragraph [0092], "films", "membranes"; see *also*, paragraph [0093], "paper", "adsorbent in nature") and a fluorescent substance (see paragraph [0145], "aromatic amines such as[...] hydrazine") (paraphrasing mine).

Therefore, unity of invention is lacking because the technical feature linking the inventions does not constitute a special technical feature as defined by PCT Rule 13.2, because the technical feature does not define a contribution over the prior art.

Applicants are advised that a complete reply to this requirement must include: (i) an election of invention to be examined, even if the requirement is traversed¹ (37 CFR 1.143), and (ii) identification of the claims encompassing the elected invention. An argument that claims are allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Applicants are reminded that upon the cancellation of claims to non-elected inventions, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

¹ Applicant may elect an invention or species with traverse or without traverse. To reserve a right to petition, Applicant must elect with traverse. Should Applicant traverse on the ground that the inventions or species are not patentably distinct, Applicant should clearly admit on the record, or submit or identify evidence on the record that the inventions or species are obvious variants. If Examiner finds one Inventions unpatentable over the prior art, Examiner may use the evidence or admission of record to reject other inventions under 35 U.S.C.103(a).
